

Informed consent by subjects to participate in a research study

I have read the information presented in the information letter about a study being conducted by Tobias Bernard at TU Berlin. I understand that I will be participating in a research project in exploring various Virtual Reality interfaces, and that I will be engaging in a study and the procedures are described in the attached letter of information. I have had the opportunity to ask any questions related to this study, to receive satisfactory answers to my questions, and any additional details I wanted.

I am aware that the following data is recorded for later analysis: questionnaires and input data from the VR headset and controller I am using. I hereby confirm that all data can be saved and used for scientific analysis in an anonymized way. I am aware that I may allow excerpts from the conversational data from this study to be included in teaching, scientific presentations and/or publications, with the understanding that any quotations will be anonymous.

I am aware that my participation is voluntary and that I may withdraw my consent for any of the above statements or withdraw my study participation at any time without penalty by advising the researcher. I was informed that if I have any comments or concerns resulting from my participation in this study, I may contact Tobias Bernard (hi@tobiasbernard.com) or David Lindlbauer (david.lindlbauer@tu-berlin.de).
